

ENHANCED HANDS-ON PROPANE TRAINING

OVERVIEW:

These part-time intensive programs are *enhanced* versions of the National Propane Gas Association's **Certified Employee Training Program (CETP)**. Successful completion of each course, passage of the included test and submission of the related *skills assessment verification**, will earn NPGA certification. Achievement of NPGA certification is the requirement for a person to qualify for state licensing endorsements. Once certification is achieved, the initial state license and/or endorsements will be issued according to the licensing law. Under both CETP rules and state requirements, all must pass, and become certified in the course known as *Basic Principals and Practices* in order to receive certification in any other segment of CETP or qualify for any state license endorsements. Call the MEMA office at 729-5298 if you have any questions.

Below is a chart that outlines the state license endorsement names (**in bold**) and the CETP certifications needed to qualify for those endorsements. Maine law requires that those who work with propane be trained and licensed to do so.

**Skill Assessment Verification refers to a process that must occur from the technician's company. CETP forms are provided so the student's on the job supervisor or other qualified individual can validate that job involvement corresponds with aspects of the course subjects covered.*

Basic Principals & Practices 1.0 Prerequisite Certificate to all Others		
Delivery Technician 2.1 Propane Delivery Operations & Cylinder Delivery 2.2 Bobtail Delivery Operations	Plant Operator 3.1-3.4 Plant Operations 3.5 Performing Cargo Tank Product Transfers 3.6 Performing Railcar Product Transfers 3.7 Maintaining DOT Intermodal (IM) Tanks	Tank Setter & Outside Piping 4.1 Layout Design & Selection of a Vapor Distribution System 4.2 Preparing & Installing Vapor Distribution System Components 5.1 Designing & Installing Dispenser Transfer Systems
